

ABHIJITH KM

FULL-STACK SOFTWARE ENGINEER

+91 91884 18821 | meabhijithkm@gmail.com | Kerala, India
github.com/abhijithkm | linkedin.com/in/abhijith-km | abhijithkm.space

PROFESSIONAL SUMMARY

Full-stack software engineer with 9+ years building production software — from government web portals to enterprise, multi-tenant SaaS. Ships end to end: React 18 + TypeScript frontends (Material UI, Redux Toolkit, React Query) and C# / .NET 8 backends (ASP.NET Core, MediatR CQRS, Entity Framework Core, SQL Server), deployed on AWS with Docker, Kubernetes, and CI/CD. Additional depth in PHP/Laravel development.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, PHP

Frontend: React 18, Material UI (MUI), Redux Toolkit, TanStack React Query, Emotion / CSS-in-JS, HTML, CSS

Backend: .NET 8 / ASP.NET Core, MediatR (CQRS), Entity Framework Core, REST APIs & microservices, background jobs (Hangfire, MassTransit), Laravel, CodeIgniter

Databases: SQL Server, MySQL, Redis

Cloud & DevOps: AWS (S3, Secrets Manager, DynamoDB, Athena, CodeBuild), Docker, Kubernetes, CI/CD, Git, GitHub

PROFESSIONAL EXPERIENCE

Software Engineer

2024 – Present

NimbleXcel Software Pvt Ltd

- Ship full-stack features for an enterprise, multi-tenant car wash management SaaS platform — React 18 / TypeScript interfaces built with Material UI, Redux Toolkit, and React Query.
- Design and implement backend services in C# / .NET 8 with ASP.NET Core APIs and MediatR CQRS patterns, using Entity Framework Core over a multi-tenant SQL Server database with Redis caching.
- Own AWS integrations (S3, Secrets Manager, DynamoDB) and background job pipelines (Hangfire, MassTransit); ship features through Docker / Kubernetes deployments with AWS CodeBuild CI/CD.
- Migrate legacy ASP.NET MVC modules toward a microservices architecture, integrating payment gateways and third-party services.

Software Engineer

2023 – 2024

AdroitMinds Software Labs

- Built a reusable React component library adopted across client web applications, and integrated custom themes into existing products.
- Deployed production applications and REST APIs to AWS infrastructure.

Instructor (Grade II)

2021 – 2023

Government Engineering College Idukki (GECI)

- Led lab sessions and mentored students; developed internal web applications and the college website using Laravel and MySQL under the Software Development Cell (SDC).

Tradesman

2017 – 2021

Government Engineering College Idukki (GECI)

- Developed in-house software for the college, including a co-operative bank web portal, attendance management, and hostel admission systems.

PROJECTS

Developer Tools & Web Apps — 12+ live applications

2023 – Present

React, TypeScript — abhijithkm.space

Designed, built, and deployed 12+ production web tools — including a database schema visualizer, a JSON data generator, a developer toolbox, an events platform, and more — all live under a single custom domain (abhijithkm.space).

KGOA Member Portal

2021 – 2022

Laravel, MySQL

Role-based web portal for the Kerala Gazetted Officers' Association — a state-level officers' association — managing membership, news, and event activities.

Co-operative Bank (OPPAM) Web Portal

2017 – 2018

PHP, MySQL

Portal for a district co-operative bank to manage Kudumbashree units and accounts under the OPPAM scheme.

Feedback & Operations Systems — GEC Idukki

2017 – 2021

Laravel, CodeIgniter, MySQL

Faculty-evaluation feedback platform (built under the SDC) plus timetable-based attendance tracking and hostel admission management software.

EDUCATION

B.Tech in Information Technology

2014 – 2017

Government Engineering College Idukki

Diploma in Information Technology

2011 – 2014

Govt. Polytechnic College, Purappuzha
